

## New & Refreshed e-Learning on Introduction to ZDHC

### Overview

Considering the evolution and changes in ZDHC over the last few years, we have refurbished the e-learning 'Open Introduction to ZDHC' with relevant updates to ensure alignment with the programme to a new 'Introduction to ZDHC' course. This course works as a great starting point for those who would like to understand more about ZDHC & its programme. Its also suitable for those who have previously done this e learning, as the new version is aligned with all programme updates.

This self-paced e-learning course provides a basic introduction to ZDHC, the Suppliers Roadmap to Zero Programme, implementation solutions, and key information platforms that support the industry. The course is designed to help learners better understand ZDHC's approach to sustainable chemical management.

### Who Should Attend

Suitable for brands, suppliers, and other stakeholders interested in the ZDHC Roadmap to Zero Programme. No prior chemical management knowledge or certification is required.

---
